

On the 24th of May 2012, a workshop was organized at the headquarters of the **Faculty of Engineering and Management of Technological Systems (Polytechnic University from Bucharest)**, within the frame of the **“UETPNET-University Enterprise Training Partnership Networking for upgrading skills using online tools”** project

The UETPNET project is financed through the Erasmus Programme, within the *Lifelong Learning Programme* of the European Commission.

The workshop was organized in partnership by **CNIPMMR** and **CTANM – Universitatea Politehnica din București (The Centre for Advanced Technologies - Polytechnic University from Bucharest)**.

At the event attended representatives of the entrepreneurs, of the students, of CNIPMMR and of the teachers in the Polytechnic University from Bucharest.

The **purpose** of the meeting was that of *informing the participants* regarding the results of the UETPNET project, as well as that of *testing the web tools* during a hands-on session. Also, the workshop was a *training seminar for the stakeholders* who would then be able to use the tools.

The participants to the workshop appreciated the idea of the project, as well as the web tools. In the session dedicated to discussions, they suggested various ways of improving the tool functionalities and aspect, their suggestions being the basis of a national report which would be elaborated at the end of the testing period.
